SNO-CONE MACHINE

Note: All concession equipment should be operated on its own 20 amp/110v circuit!

Operating Instructions

1. Place unit on a flat, secure surface.
Be aware that there is a drain in the machine to let water escape. You may want to place a towel or large cookie sheet under the unit.
2. Remove lid from syrup bottle. Insert a pump into the bottle and screw in place.
3. Connect unit's power cord to your electrical source.
4. If light is needed, the light ON/OFF switch is located next to the motor switch.
5. Place a scoop full of cubed ice into grinder chute, then close chute lid.
6. Turn the machine motor switch to the "ON" position.
7. Gently, yet firmly, press down on chute lid to pass the cubes through the chute.
8. When desired amount of ice has been shaved turn the motor unit off until you are ready to shave more ice.

NOTE: DO NOT LEAVE MOTOR RUNNING WHEN UNIT IS NOT IN USE.

You will now have shaved ice to prepare a sno-cone.

9. Use the small ice scoop to fill the cone and add desired amount of syrup.
10. When finished, be sure to remove pump(s) from bottle(s) and return with unit.

**NOTE: (1) GALLON OF SYRUP WILL MAKE APPROX. 100 SNO-CONES.
(1) POUND OF ICE WILL MAKE APPROX. 3 SNO-CONES.**

Accessories: (1) Large ice scoop
(1) Small ice scoop
(1) Sno-Cone holding tray
(2) Pumps

Customer will be billed for any missing/damaged items.
